

O. C. SHEPARD CO. MEDINA, O.

LOWER PRICES—Many prices of grain and grain products have declined during the past few days. We are now able to sell a number of standard feeds at considerable reduction.

OATS—Oats are still the lowest priced feed. We have just received several large shipments from the west and are in position to furnish them in any quantity. We make special inducements to "cash and carry" buyers of large lots. The oats are of the best grade obtainable.

MARKET WHEAT—We are in the market for all grades of wheat all the time. Our elevator on the Smith road affords service in the most convenient and quickest service in the way of unloading of any place in Medina County.

99.8 per cent PURE GERMINATION 97 per cent—We have one lot of timothy seed for sale which bears the above analysis. It retails at \$7.00 and is the cheapest seed that can be bought. We also have timothy seed at less money. The state law now requires all seed dealers to have licenses and to label all seed offered for sale with analysis and germination tests. All seed sold by us will bear proper labels.

FULTZ SEED WHEAT WANTED—We wish to obtain a few hundred bushels of Fultz wheat suitable for seed. Will pay a premium.

WANTED—A few farmers to grow some fancy varieties of wheat for us on contract.

MEDINA HIGH SCHOOL HAS \$1,000 IN BONDS

COMMUNITY STRUCTURE MAY COMBINE NEEDS

Large Gym and Baths Can Be Used By Schools and Public With Minimum Conflict.

Last week's Sentinel told the story of the aims and hopes of Medina people interested in uplift work here, among which is a desire for a community house of some sort. First, many people would be pleased to see an institution built that will give a wholesome service for the whole community; second, an institution that will give rest-room comforts in case not enough money can be secured for the larger proposition.

Every citizen interviewed agreed that a large gym, with modern bathing facilities—including swimming pools—was about the right thing to build. The structure should be of large enough dimensions to provide two large gym floors, suitable for basket ball games—one for each sex—with two large swimming pools, tub and showers, rub rooms, and each section built with balcony so that games and exercises might be viewed by parents and friends of contestants.

This structure need not be a highly ornamented building; it can be made neat and plain, warm, well lighted, properly equipped with modern conveniences and paraphernalia. In this case the cost will mean a minimum investment with a maximum of efficiency and convenience.

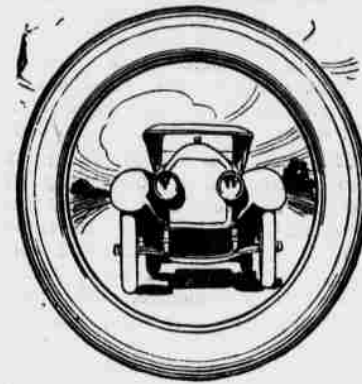

As many Medina citizens will remember, friends of Medina High school started the ball to rolling with the hope of securing a similar structure for High school uses, prior to the world war, but not on so extensive a scale. Upwards of a thousand dollars has been secured, since invested in Liberty bonds. Interviews with school officials brought out the fact that such a structure could, under proper supervision, be made to

Thru Your Tire

runs layer upon layer of skillfully vulcanized fabric. The job of the tire repair man calls for an intimate knowledge of tire anatomy if he is to dissect the weak sections from the strong and rebuild a tire body sufficiently sturdy for resisting pressure strains and grueling road rub. Let us show you that expert repairs do pay biggest returns.

India Tire & Service Station

grades would greatly enjoy its privileges, while the benefits to health and development would prove beyond price. In many of our larger universities gym work is now required, an indication of the value which great educators place upon this form of recreation.

Many a middle-aged and advanced aged person has rejuvenated himself by systematic recreation of this character. Older men and women in Medina, who would avail themselves of such privileges, would so far improve in locomotion that their nearer friends could not but wonder at the improvement. Then, too, our physicians could avail themselves of this means toward getting results in their practice, results in the case of men and women suffering from ailments induced by a sedate life that would astonish both patient and physician.

The men and women interested in community work in Medina cannot do better than study this proposition. There is no doubt but once awakened to the good which such an institution will bring both to this and succeeding generations the people of this little city will contribute to a total that will build and equip all the necessary cost for operation.

AMERICAN LEGION ORGANIZER HERE NEXT WEEK

John Moore received word on Tuesday of this week that a representative of the American Legion from Columbus would be in Medina next week and lay plans for the organizing of a branch in this county.

A telephone message later stated that definite plans had been mailed to Mr. Moore, but these had not arrived as the Sentinel went to press.

OBITUARY

Don Hobart Friedt, youngest son of Levi and Anna Friedt, was born at Guilford, Ohio, Feb. 21, 1896, and died Oct. 1, 1919, aged 23 years, seven months and eight days.

He was baptized by Rev. J. H. Barron and united with the M. E. church at Chatham in 1908.

The deceased became afflicted early in 1913 and was thought to have been cured, or nearly so, when he was called to the colors in 1917, after which he soon showed signs of failing health, which continued until in Sept. of this year when he took to his bed and was unable to arise permanently until he answered the summons from above, where the faithful rest from their labors and their works do follow them.

Don leaves father, mother, two brothers, one having died in infancy, a large circle of friends and acquaintances to mourn his early departure.

But we shall not mourn as those who have no hope, for we expect to see him again in that fairer country where there shall be no parting with loved ones, but where we shall dwell in the presence of God and the Lamb forever.

PUBLIC SALE

Having sold my farm, I will sell at public auction, one mile south of Lafayette Center, three miles north of Leroy and two miles west of Chippewa Lake station, on

SATURDAY, NOVEMBER 1, 1919 commencing at 1 o'clock p. m. sharp, the following:

One horse, eight years old, good for all purposes and a good family horse.
Two cows, one 8 years old, half Jersey; one full blood Jersey.
Ten pigs, 8 weeks old; 1 single work harness, 1 wagon harness, 1 Cleveland cream separator, 1 spring-tooth harrow, 1 Imperial plow, 2 harrows, 1 two-horse wagon, 1 buggy, about 16 Ancona chickens, 15 Plymouth Rocks, hedge fence posts, Locust mixed; and other articles too numerous to mention.

More Than 75,000 Satisfied Users

DELCO-LIGHT was designed and built by men who were raised in farm homes—who experienced the discomforts and inconveniences of farm life—and who set out deliberately years ago to develop an electric plant that would provide city advantages for rural communities.

They were the same men whose engineering talent had made DELCO Starting, Lighting and Ignition Equipment for automobiles the standard of the world—

They knew electricity—and they knew the needs and limitations of farm life—

They knew that an electric plant to give service in a farm home must be simple, so that it would not get out of order and require complicated repairs—

It must be easily operated and require little attention—

It must be very economical in operation—

It must be built to stand hard usage and it must last indefinitely—

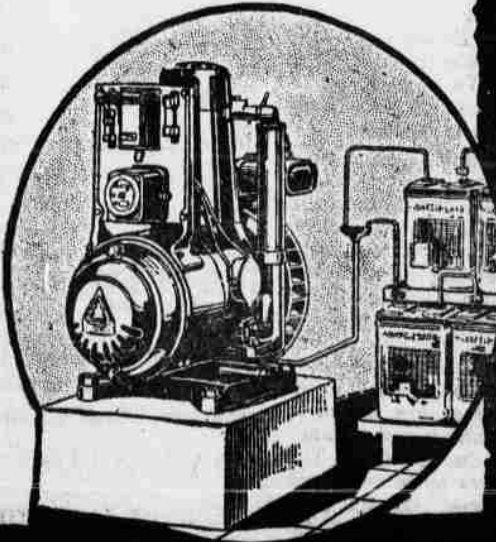

It required five years to develop a plant that would measure up to these specifications.

There were five years of hard engineering effort back of DELCO-LIGHT before the first plant was put on the market three and a half years ago.

Today DELCO-LIGHT is furnishing the conveniences and comforts of electricity to more than Seventy-five Thousand farm homes.

It is providing an abundance of clean, bright, economical electric light for these homes. It is furnishing power to pump water, operate washing machine, churn, separator, vacuum cleaner, electric iron, milking machine, and other small machinery.

And everywhere it is demonstrating its wonderful efficiency—and actually paying for itself in time and labor saved.

DELCO-LIGHT

A complete electric light and power plant for farms and country homes, self-cranking—air cooled—ball bearings—no belts—only one place to Oil—Thick Plates—Long Lived Battery—RUNS ON KEROSENE
